11/8/2012 19:23:45	It's like a parade of rotating marble fountains! Catches my attention straight away. I like the images scrolling across the screen.	Yes	Yes	The video on the About page loaded fine. The links to the catalog and location brought me to an error page. Not sure if this is to be added later as the site is worked on more.	Yes	Aside from links, everything works fine and loads correctly. All images and text seem to be in their proper places.	I might brighten up the look a little. The black background is a little too much on the eyes. But the site looks as good as anything else I've seen out there. The layout flows nicely.
